VW Tech

STEP 1.

You get these beautiful boxes delivered to your door.

STEP 2.

Remove from the box to find these exquisite items inside.

STEP 3.

STEP 4.

Remove top clips gently with screwdriver.

STEP 5.

Same for bottom clips.

STEP 6.

Heat evenly all around with heat gun.

STEP 7.

Pry apart with a screwdriver.

STEP 8.

Ditto...

STEP 9.

Voila, headlights with no lenses.

STEP 10.

Set glass aside.

STEP 11.

Your good friend masking tape.

STEP 12.

Mask away my friend...

STEP 13.

Final masked product, I also taped off the seal so I could reuse the existing silicone.

STEP 14.

Find a clean dry place to paint.

STEP 15.

Clean all areas to be painted with rubbing alcohol.

STEP 16.

Pick your weapon of choice, I choose high temp engine enamel, in dark matte grey (just to be different).

STEP 17.

Paint away, many light coats.

STEP 18.

Remove masking...

STEP 19.

Unmasked product.

STEP 20.

Reheat silicone seal.

STEP 21.

Re-attach glass, and voila finished product.

Done.
